“Give me a lever long enough, and a place to stand, and I will move the earth.” — Archimedes

## Summary

I am a software engineer and entrepreneur based in Amsterdam. I have professional software development experience for 12+ years and have taken several leading roles in various tech companies.

My main strength is in software development and architecture and I am very comfortable with coding in Python. Having experience in backend, frontend, and native mobile development, I consider myself a full-stack ninja who is able to set up and architect the underlying infrastructure and build modern internet products.

## Work Experience

### SPEQT

Co-FOUNDER & CTO
